Please note that this article was not written by me and I don't know anything about the author. In the second paragraph, the author talks about their driver download process for Windows 7. In conclusion, they say Windows 7 has a lot of useful features, but they were unable to figure out how to install an NVIDIA driver in windows without going through several steps. They advise not installing any drivers from here since it will only cause problems for you! Hello there! Today we'll be talking about a few hardware drivers that you might need in order to run your computer properly - specifically a NVIDIA GeForce GT 630M Graphics Driver installer which is needed when trying to install an NVIDIA GPU in windows through the Integrated Dell Video Controller. The NVIDIA GeForce GT 630M Graphics Driver is not the only driver you might need when installing one in windows. Here are some "Helpful Links" when attempting to find an answer for this problem. How to Install NVIDIA Drivers in Windows 7 (Source) - This video is about installing a NVIDIA video driver in windows 7. You will get more specific details here. (Tutorial Video) <http://www.youtube.com/watch?v=RVnMtSWv7zo> - For more information on how to install a video driver in windows, check out these helpful links! (Blog) <http://www.megaconductormemorycardsdirectsales.com/asus-p100-geforce-gtx880-gm24000-graphics-drivers.html> - This is a blog about installing video cards in windows 7. (Blog) <http://www.nvidia.com/Download/index.aspx?lang=en-us> - This is the official website for downloading nvidia drivers. Try using this because it will have the most updated ones! (Tutorial Video) <http://www.techspot.com/vb/topic...> - This is a lot of helpful information that can help if you're having problems installing nvidia video drivers in windows 7. (Tutorial Video) Brief Summary: If you have a fairly new computer with a NVIDIA GPU, don't install any drivers from here at all. The problem will only get worse the more you try to install! Just let your computer work it's magic and be patient. You'll notice a significant improvement in your performance once your installed! This is not really an issue if you have been using Mozilla Firefox for quite some time considering that there are no broken/bad/missing add-ons or other huge problems that would require the installation of NVIDIA drivers. If you're still using an old computer and you want to install a NVIDIA driver, try using the old-school way of installing them. To do this, go to the official NVIDIA website and download and install them! If you can't find what you need there, do what I did: Email NVIDIA and tell them your issue. Even if they don't give you an answer right away, they will usually get back to you within a few days.
